

DNA 360 — Gymex Export, Structured Reference

Converted from Employees_details.xlsx for use as build input. Five source sheets.

Member records are deliberately not reproduced in full. The Live Members sheet holds 679 real people with names, mobile numbers and dates of birth. A coding agent needs the *schema* to build the import pipeline, not the people. Section 5 gives the column list plus anonymised sample rows. Point the real file at the import pipeline directly when it is time to migrate.

1. Staff

#	Name	Designation	View Revenue

View Revenue is an existing permission flag in Gymex — carry it into the new system as a first-class per-user permission.

2. Product catalogue

205 SKUs. BaseCost is GST-inclusive. Tax Rate is per-row —

note the Marketing rows carry 18% while everything else is 5%.

MembershipUsedAs is unreliable in the source data: session counts appear only inside the product name. The Sessions (parsed) column below is extracted from the name string and **must be human-verified before go-live**.

Valid To		2027-03-31
Base Cost		41428.571 <- ex-tax; x1.05 = 43500 inclusive
Net Cost		37285.714 <- ex-tax, after discount
Marketing Prefs		SMS,Email
Life Time Value		129948

Migration notes

- Zero duplicate mobile numbers, zero duplicate names, 2 malformed phone numbers.

• Six sales reps in the data are not on the current staff list — create as inactive users so historical attribution survives. Krish Rawat also appears as

Krrish Rawat; dedupe on import.

- 482 of 679 members (71%) are on Annual Gym Membership Package - 1.

- At export date, 5 memberships had expired and 85 expired within 30 days.

• **Not present and still required from the client:** remaining PT / Fitzone / Pilates session balances, outstanding dues, attendance history, membership history, historical invoices, leads and lapsed members.
